

PT MEDIKA MAESINDO GLOBAL

# COMPANY PROFILE

PT Medika Maesindo Global (MMG) is a leading manufacturer of spunbond fabric and disposable protective clothing for both medical and industrial applications. With over 30 years of experience in the PPE disposables industry, we have earned a reputation as a trusted and reliable partner for all your protection needs.

PT MEDIKA MAESINDO GLOBAL

## 1995 **Started by PT Maesindo Masanusa**

Starting from PT Maesindo Masanusa as the forerunner, this company started as a work uniform factory that was considered in Indonesia. The production capacity of expert tailors fulfilled the needs of work uniforms for large companies in the country.

Located in Bantul, Indonesia, Maesindo Masanusa employs hundreds of productive people with customer satisfaction as its main purpose.

## 1998 **Export the workwears rapidly**

GM Equipment was acquired by the VDI Group (a UK-based Bunzl Healthcare company). Rene Mace took the opportunity to open PT Maesindo Indonesia as an complete manufacturer, produced the ready-to-use protective suites. It produced nonwoven fabrics and also converting them into ready-to-wear protective clothing.

## 2000 **Maesindo focused on Nonwoven**

Seeing the great potential market of nonwoven fabric in Indonesia and Europe, Maesindo Indonesia built a spunbond nonwoven production machine to meet raw materials independently.

Production capacity has increased, and exported to Germany, France, and England were increased. The use of disposable work clothes in Indonesia has begun to grow, along with the concept of hygiene in the work environment.

## 2006 **Produced Nonwoven Spunbond**

Seeing the great potential market of nonwoven fabric in Indonesia and Europe, Maesindo Indonesia built a spunbond nonwoven production machine to meet raw materials independently.

Production capacity has increased, and exported to Germany, France, and England were increased. The use of disposable work clothes in Indonesia has begun to grow, along with the concept of hygiene in the work environment.

## 2007 **Expand the business & production**

The increasing demand for disposable protective clothing domestically and abroad, Maesindo developed a mask and mobcap machine. The concept of head-to-toe protection became the basis for the development of Maesindo's protection business.

In the same year, Maesindo developed a ho-re-ca accessories business because customers in Europe were ho-re-ca distributors. A great opportunity was taken by developing chef hat products, paper doilies to muffin cups made of paper.

## 2018 **Completing the protective clothing**

Strict requirements for medical workers and industrial workers, forced Maesindo Indonesia to develop disposable protective clothing products with level 3 and level 4 protection standards that were more complete, more effective and more competitive.

Factory workers were adaptive to new products development help businesses grow rapidly. New patterns and raw materials can be worked on without reducing productivity.

## 2020 **Spin off, a turning point of MMG**

The implementation of new standards in medical protection became the starting point for the spin-off of Medika Maesindo Global from Maesindo Indonesia since Maesindo Indonesia's factory capacity was no longer sufficient at that time.

The MMG factory was built in 12 months in Temanggung, Central Java. At the same time, in one place near the construction, protective clothing workers have started producing the needs of PPE in the world.

## 2021 **MMG operated independently**

Mid-2021, MMG has been established independently, carrying out production, administration and export processes directly. MMG management has been separated from Maesindo, and manages clients better.

Domestic medical products are one of the focuses of MMG's business development in accordance with post-pandemic medical protection regulations. MMG also produces spunbond nonwoven fabrics for other industries, such as agriculture, shopping bags, etc.
